

I enjoy building everything from small business sites to rich dynamic web apps. I'm adept at designing, developing, and launching websites that incorporate modern styling implementations like responsive and adaptive design. I've worked with clients constructing websites from scratch, and I have built custom templates for use on Content Management Systems like Wordpress. I've worked on several projects with 3 - 4 person teams, and I'm proficient in Agile development projects using collaborative tools like Github. My skill-set is varied, and I'm always eager to try new methods and technologies to build things that are functional and beautiful.

Technical Skills

HTML★★★★☆ | CSS★★★★☆ | JavaScript★★★★☆ | PHP★★★★☆ | jQuery★★★★☆
Github★★★★☆ | Java★★☆☆☆ | Python★★☆☆☆ | SQL★★★★☆ | Bootstrap★★★★☆
